

Getting Clear on What Your Site Is For

Instructions

Answer the following questions to help determine the purpose and structure of your SharePoint site. Think carefully about the needs of your team and how best to meet them.

Short Answer Questions

1. What keeps getting lost or hard to find? Describe a recent situation when a team member couldn't find something important. What was it? Where should it logically be stored?
 2. Who needs to be able to find it? Identify the groups or individuals who need to access this information.
 3. How often does it change? Consider the frequency of updates needed for this information.
 4. What does "this is working" look like? Envision the team's situation six months from now. What tasks or challenges should be resolved if the site is effective?
